

HELP TRACK PLANTS AND ANIMALS IN KINGSTON INNER HARBOUR

A STEP-BY-STEP GUIDE

CREATE AN INATURALIST ACCOUNT

Download the iNaturalist mobile app on your smart phone or device and create an account using your email address and a secure password.

JOIN THE PROJECT

Join the iNaturalist Project called "Kingston Inner Harbour Flora and Fauna" (from app: click "More", "Projects", search "Kingston Inner Harbour Flora and Fauna", click "Join"). Please select "Yes" under "Trust this project with hidden coordinates?" to help us understand where sensitive species and their habitats occur.

GET OUTSIDE!

Begin making observations! Visit Belle Park or any of the waterfront parks south to the LaSalle Causeway. Be sure to turn on your location services, then use your camera or in the iNaturalist app to (safely!) take a photo of any plant or animal you see.

UPLOAD YOUR OBSERVATIONS

Using the app or your browser, upload your images. Be sure to include an accurate location for each observation, as well as the date. If you know what species you saw, include that too! Data collected will be used in support of the ongoing biological inventory work and the future detailed impact assessment of Kingston Inner Harbour.

SPREAD THE WORD!

This is a community effort to document all sorts of plants and animals around Kingston Inner Harbour. Tell a neighbour, friend, or family member and invite them to join in the fun!
